

El litro (L) es una unidad de volumen que equivale a  $10 \cdot 10 \cdot 10 = 1000$  cubos de 1 cm de arista.

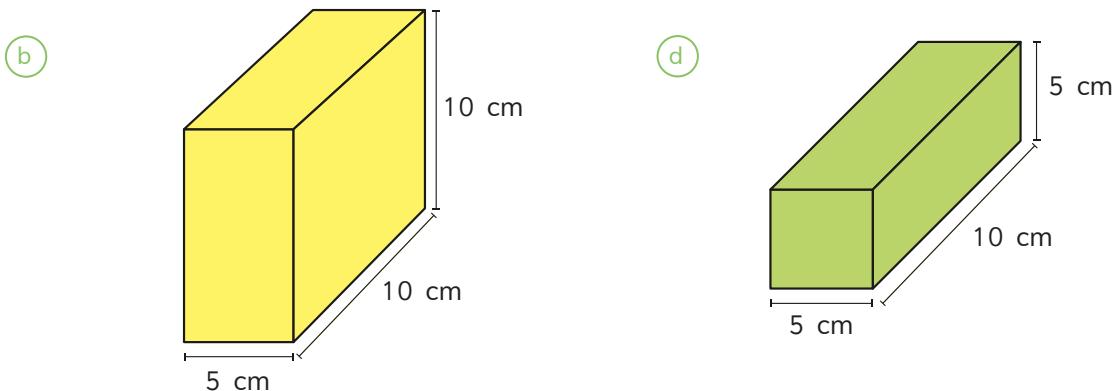

→ 1 L

5 Calcula el volumen expresándolo en litros.

$$2\,000 \text{ cubos de } 1 \text{ cm} = \boxed{?} \text{ L}$$

$$\boxed{?} \text{ cubos de } 1 \text{ cm} = \boxed{?} \text{ L}$$

$$\boxed{?} \text{ cubos de } 1 \text{ cm} = \frac{1}{2} \text{ L}$$

$$\boxed{?} \text{ cubos de } 1 \text{ cm} = \frac{1}{4} \text{ L}$$
